

## Manual Testing: User Interface

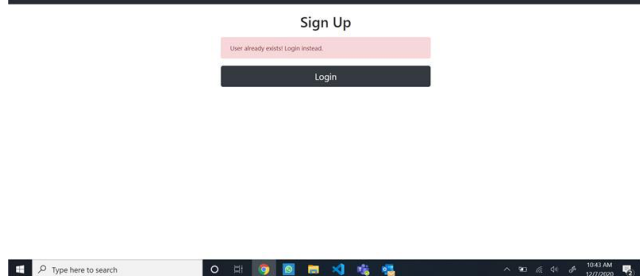

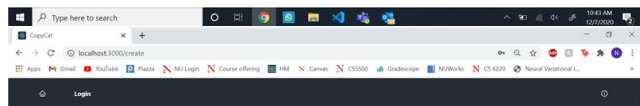

### Test Case 1: Invalid Login Credentials

In this screenshot, we validate the user input and display an error message if the information is not correct.

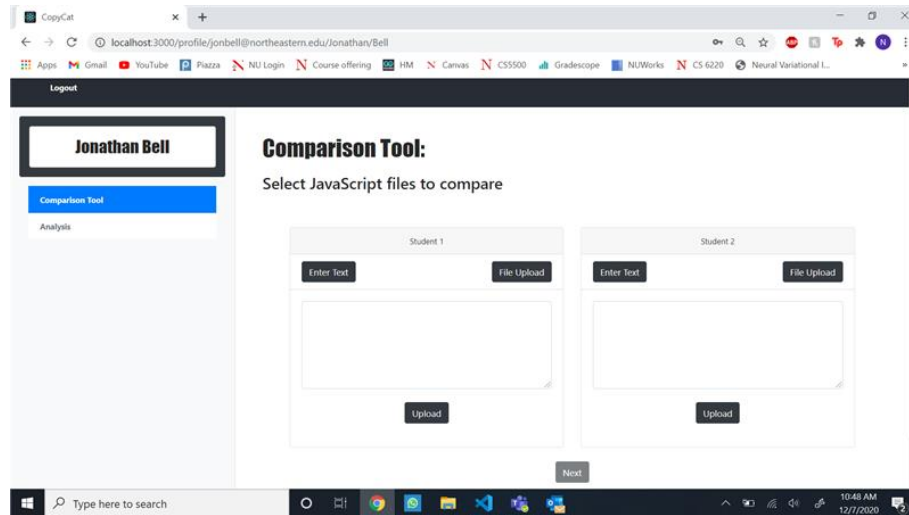

### Test Case 2: Multiple Sign-Up Attempt: Existing User

We validate that the user is in the system if they attempt to sign-up for an account. There is an error message that informs the user that they must log in instead.

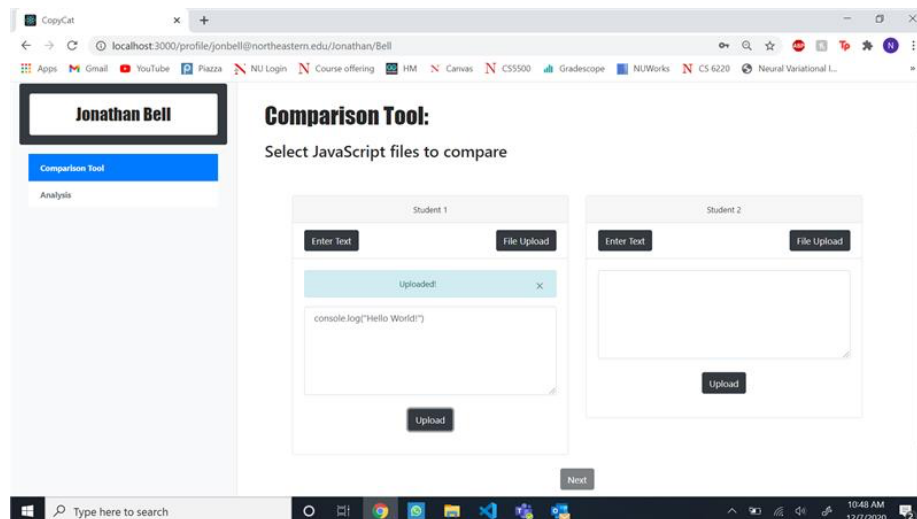

## Manual Testing: User Interface

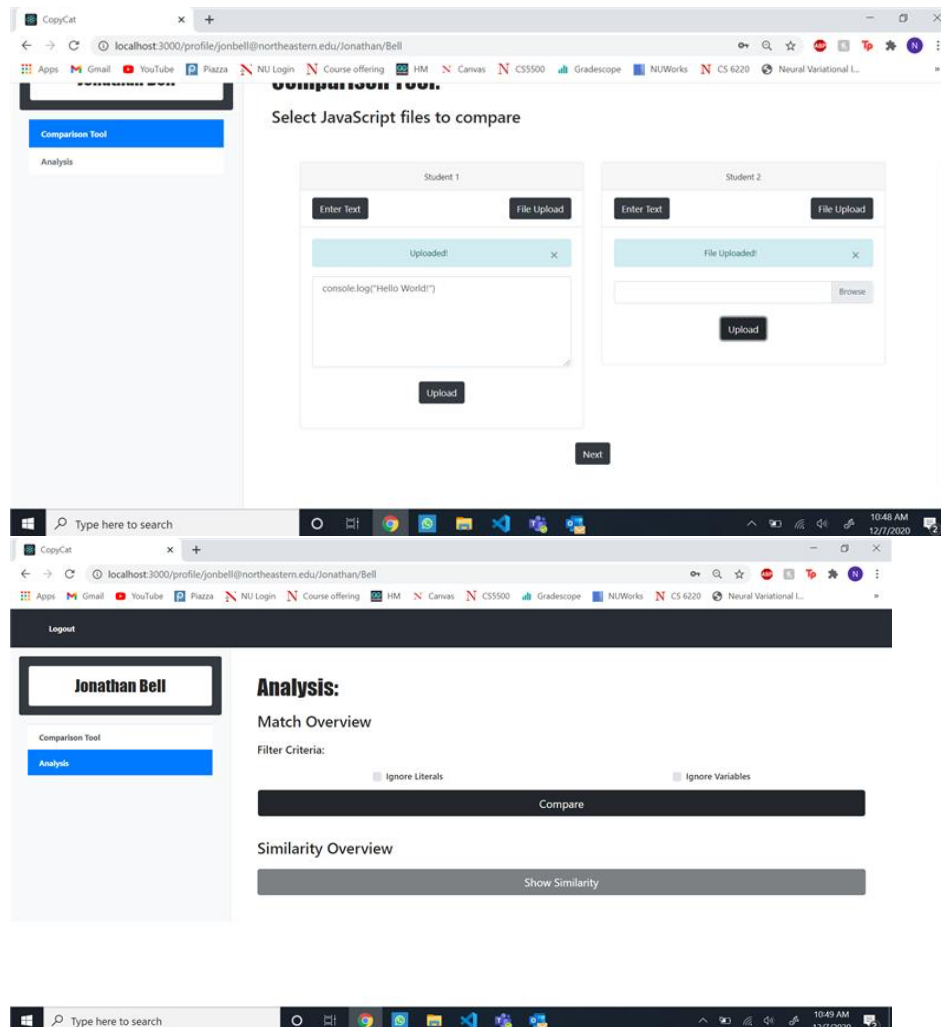

### Test Case 3: Validate Student 1 and Student 2 File Upload

We ensure that there is a file upload for each student to run the comparison before enabling the next button to the user.

## Manual Testing: User Interface

### Test Case 4: Validate Comparison and Filter and Analysis Tab

The show similarity button is only enabled after the user selects the filters (if any).
